Subject: Biolase Treatment

Dear Kim,

I just wanted to pass along to you my sincere gratitude for the rapid progress of my recovery from my auto accident which occurred on August 10, 2005. I had had back spasms that were so severe that I was in the emergency room 4 times prior to starting your Biolase treatments and could not turn my head without neck pain. After just two treatments the tightness was dramatically improved and now after five treatments, the pain and tightness is all but gone. Needless to say, I have not had a back spasm since I began treatment just 3 weeks ago.

Again, thank you for your help with this problem. I previously had other types of physical therapy treatments without any improvement and at times had gotten worse.

I wish you all the success with your product and it's future in helping others as you have in my case.

Helen Davis
